## EXO® AP HOOK

EXO AP HOOK is a personal escape system with HOOK anchor hook adapted for locations where the possibility of finding an anchor point is uncertain. It has a self-braking system with anti-panic function for quickly moving horizontally, climbing through a window and controlling and stopping a descent. If the user pulls too hard on the handle, the anti-panic function brakes and stops the descent automatically. EXO AP HOOK also includes a rope that resists wear and high temperatures, an Am'D connector with CAPTIV positioning bar, as well as a bag for transporting and attaching the system directly to the harness. Other rope lengths and other types of connectors (EASHOOK OPEN...) available by special order.

If the user pulls too hard on the handle, the anti-panic function brakes and stops the descent automatically.

The anchor hook may be used around a structure, secured with a locking hitch.

---

**Short Description** Personal escape system with anchor hook

---

**Selling Points**

- Multipurpose HOOK anchor hook is versatile and usable in locations where the possibility of finding an anchor point is uncertain Can be used in two ways:
    - around a structure, secured with a locking hitch
    - on a window sill, as a last resort
  - Self-braking system with anti-panic function for:
    - rapid horizontal movement
    - going out a window
    - controlling and stopping a descent: if the user pulls too hard on the handle, the anti-panic function brakes and stops the descent automatically
    - limiting the force transmitted to the user in the event of a fall
  - Aramid fiber static rope, 15 m length and 7.5 mm diameter, resists abrasion and high temperatures
  - Am'D connector with CAPTIV positioning bar to favor keeping the connector in the right position and integrated with the device
  - Fire-resistant carry bag to attach the system directly to the harness
- Available in other rope lengths and with other types of connectors (EASHOOK OPEN...) by special order.
